Section I

Introduction

This Blight Study was completed in April 2019 by the Marlborough Community Coalition (the “Coalition”) with assistance from an interdisciplinary team of students in the Entrepreneurial Development course at the University of Missouri-Kansas City (“Surveyors”). The proposed redevelopment area (“Study Area”) is located in Kansas City, Jackson County, Missouri, and is generally bound by 77th Street on the north, 85th Street on the south, Prospect Avenue on the east, and Troost Avenue on the west.

The primary purpose of this work was to analyze conditions located within the Study Area to determine if it qualifies as a “blighted area,” a requirement of establishing an urban renewal area under Chapter 99 of the Missouri Revised Statutes.

The Surveyors visited the Study Area on numerous occasions from early February through mid-April 2019. The effective date of this study is April 25, 2019.

The Study Area encompasses approximately 1,236 tax parcels and 348 acres, excluding all right-of-way. The Study Area covers approximately 640 acres including all public right-of-way, according to Kansas City Parcel Viewer and the Environmental Systems Research Institute (“ESRI”) research site.

Definition of Criteria

Chapter 99.300 of the Missouri Revised Statutes entitled “Land Clearance for Redevelopment Law” allows for the creation of the Land Clearance for Redevelopment Authority (“LCRA”) within a municipality and empowers the authority to submit redevelopment plans to the City of Kansas City, Missouri (“the City”). However, “an authority shall not prepare a redevelopment or an urban renewal plan for a land clearance or urban renewal project area unless the governing body of the community in which the area is located has declared, by resolution or ordinance, the area to be a blighted, or insanitary area in need of redevelopment or in need of rehabilitation” (RSMo. Ch. 99.430(2)).

Redevelopment and investment within the proposed Study Area may be accomplished through the implementation of an urban renewal process, specifically under Chapter 99 of the Missouri Revised Statutes through the City’s LCRA. The first step in this process is to determine if the proposed Study Area qualifies as a “blighted area” or “insanitary area” eligible for urban renewal. The determination that an area constitutes a blighted area or insanitary area is a conclusion attributable to the presence of one or more physical, environmental, and social factors.

Blight

“Blighted area”, an area which, by reason of the predominance of defective or inadequate street layout, insanitary or unsafe conditions, deterioration of site improvements, improper subdivision or obsolete platting, or the existence of conditions which endanger life or property by fire and other causes, or any

combination of such factors, retards the provision of housing accommodations or constitutes an economic or social liability or a menace to the public health, safety, morals or welfare in its present condition and use. (RSMo. Ch. 99.320(3)).

Insanitary Area

“Insanitary area”, an area in which there is a predominance of buildings and improvements which, by reason of dilapidation, deterioration, age or obsolescence, inadequate provision for ventilation, light, air, sanitation or open spaces, high density of population and overcrowding of buildings, overcrowding of land, or the existence of conditions which endanger life or property by fire and other causes, or any combination of such factors, is conducive to ill health, transmission of disease, infant mortality, juvenile delinquency and crime or constitutes an economic or social liability and is detrimental to the public health, safety, morals or welfare. (RSMo. Ch. 99.320(9)).

Land Clearance Project

“Land clearance project,” any work or undertaking to acquire blighted, or insanitary areas or portions thereof, including lands, structures, or improvements the acquisition of which is necessary or incidental to the proper clearance, development or redevelopment of the blighted or insanitary areas or to the prevention of the spread or recurrence of substandard or insanitary conditions or conditions of blight...to clear any such areas by demolition or removal of existing buildings, structures, streets, utilities or other improvements thereon and to install, construct or reconstruct streets, utilities, and site improvements essential to the preparation of sites for uses in accordance with a redevelopment plan...to sell, lease or otherwise make available land in such areas for residential, recreational, commercial, industrial or other use or for public use or to retain such land for public use, in accordance with a redevelopment plan...to develop, construct, reconstruct, rehabilitate, repair or improve residences, houses, buildings, structures and other facilities...the term “land clearance project” may also include the preparation of a redevelopment plan, the planning, survey and other work incident to a land clearance project and the preparation of all plans and arrangements for carrying out a land clearance project and wherever the words “land clearance project” are used in this law, they shall also mean and include the words “urban renewal project” as defined in this section. (RSMo. Ch. 99.320(10)).

Redevelopment Plan

“Redevelopment plan,” a plan other than a preliminary or tentative plan for the acquisition, clearance, reconstruction, rehabilitation, renewal or future use of a land clearance project area, and shall be sufficiently complete to comply with subdivision (4) of section 99.430 and shall be in compliance with a “workable program” for the city as a whole and wherever used in sections 99.300 to 99.660 the words “redemption plan” shall also mean and include “urban renewal plan” as defined in this section. (RSMo. Ch. 99.320(20)).

In addition, several court cases provide additional direction in the consideration of blight:

- “To determine an area “blighted,” the area must meet the statutory definition of blight when considered in its present condition and use.” *Land Clearance for Redevelopment Authority of City of St. Louis v. Inserra*, 284 S.W.3d 641 (Mo. App. E.D. 2009).
- It is not necessary for every property within an area designated as blighted to conform to the blight definition, nor does a blighted area need to constitute what is generally known as a slum in order to be blighted. *Parking Systems, Inc. v. Kansas City Downtown Redevelopment Corporation*, 518 S.W.2d 11, 15 (Mo. 1974).
- “Economic underutilization of property is a valid basis on which to declare property blighted.” *Crestwood Commons Redevelopment Corporation v. 66 Drive-In, Inc.*, 812 S.W.2d 903, 910 (Mo. App. E.D. 1991).
- A preponderance of blight conditions is adequate to designate an area for redevelopment. *Meramec Valley R-III Sch. Dist. v. Eureka*, 281 S.W.3d 827 (Mo. App. E.D. 2009).
- “If the five named statutory factors for blight predominate by virtue of any one factor or a combination of factors and thus retard the provision of housing accommodations, constitute an economic or social liability, or constitute a menace to the public health, safety, morals, or welfare, then an area may be declared ‘blighted.’” *Land Clearance for Redevelopment Authority of City of St. Louis v. Inserra*, 284 S.W.3d 641 (Mo. App. E.D. 2009).

Since these definitions are a general overview pertaining to all sites, it is important to clarify their application to the Study Area. According to state law, it is unnecessary for the Study Area to have every condition of blight present in order to be eligible as an urban renewal area. Rather, the Study Area can be qualified as blighted or insanitary when even just one of the blight conditions is present. The conditions need not be present in each parcel, but must be found in the Study Area as a whole. With this understanding, this Blight Study presents an overview of factors within the Study Area including a review of physical conditions and empirical resources that are sufficient to make a determination of blight. However, the City will make a final determination of blight or of an insanitary area for the entire Study Area based on the extent to which conditions constitute a liability for the Study Area as a whole.

Chapter 99 Redevelopment Rights

Tax Abatement

Per Chapter 99 of the Missouri Revised Statutes, the LCRA in the City has the authority to grant tax abatement for property improvements within urban renewal areas. For the ten years following improvements, increases in property taxes due to those improvements are abated up to 100%. Property taxes on the assessed value of the property before new construction or rehabilitation continue to be paid at their original rate to the appropriate taxing districts.

Bond Financing

The LCRA has the authority to issue bonds to assist with the financing of approved projects within redevelopment areas. The LCRA also has the authority to refund bonds for the purpose of paying

or retiring bonds previously issued by the LCRA. The LCRA may issue bonds exclusively from the income, proceeds, and revenues of the land clearance project financed with the proceeds of the bonds or from the proceeds of any of its land clearance projects.

Property Acquisition

The LCRA may assist approved projects with property acquisition. The LCRA may acquire properties, coordinate relocation benefits and assistance, and make use of its powers of eminent domain, when necessary. Such powers are available to the LCRA, per RSMo. 99.460(1) "...after the adoption by it of a resolution declaring that the acquisition of the real property described therein is necessary for such purposes."

Study Methodology

This Blight Study includes a detailed analysis of site, building, and public improvement deterioration. Qualifying blight conditions throughout the Study Area were identified and analyzed on a parcel-by-parcel basis to demonstrate blight conditions present in the Study Area.

Field investigations were conducted to document physical conditions within the categories of blight set out in the state statute. Parcel Information was obtained through Parcel Viewer and analyzed. Additional supplemental and updated information was obtained through various reports and studies prepared or commissioned by the Coalition and other public entities.

Previous Blight Determinations

The Study Area has not been included in any prior redevelopment projects or blight determinations. However, the Study Area is included in the Neighborhood Housing Services Community Development Corporation minor home repair initiative. Additionally, a Commercial Overlay Zoning District is currently in place for The Paseo between 82nd Street and 79th Street, and will come into effect if and when individual businesses along The Paseo change ownership.

Adjoining Incentive Areas

The Study Area is adjacent to or in close proximity to the following incentive areas:

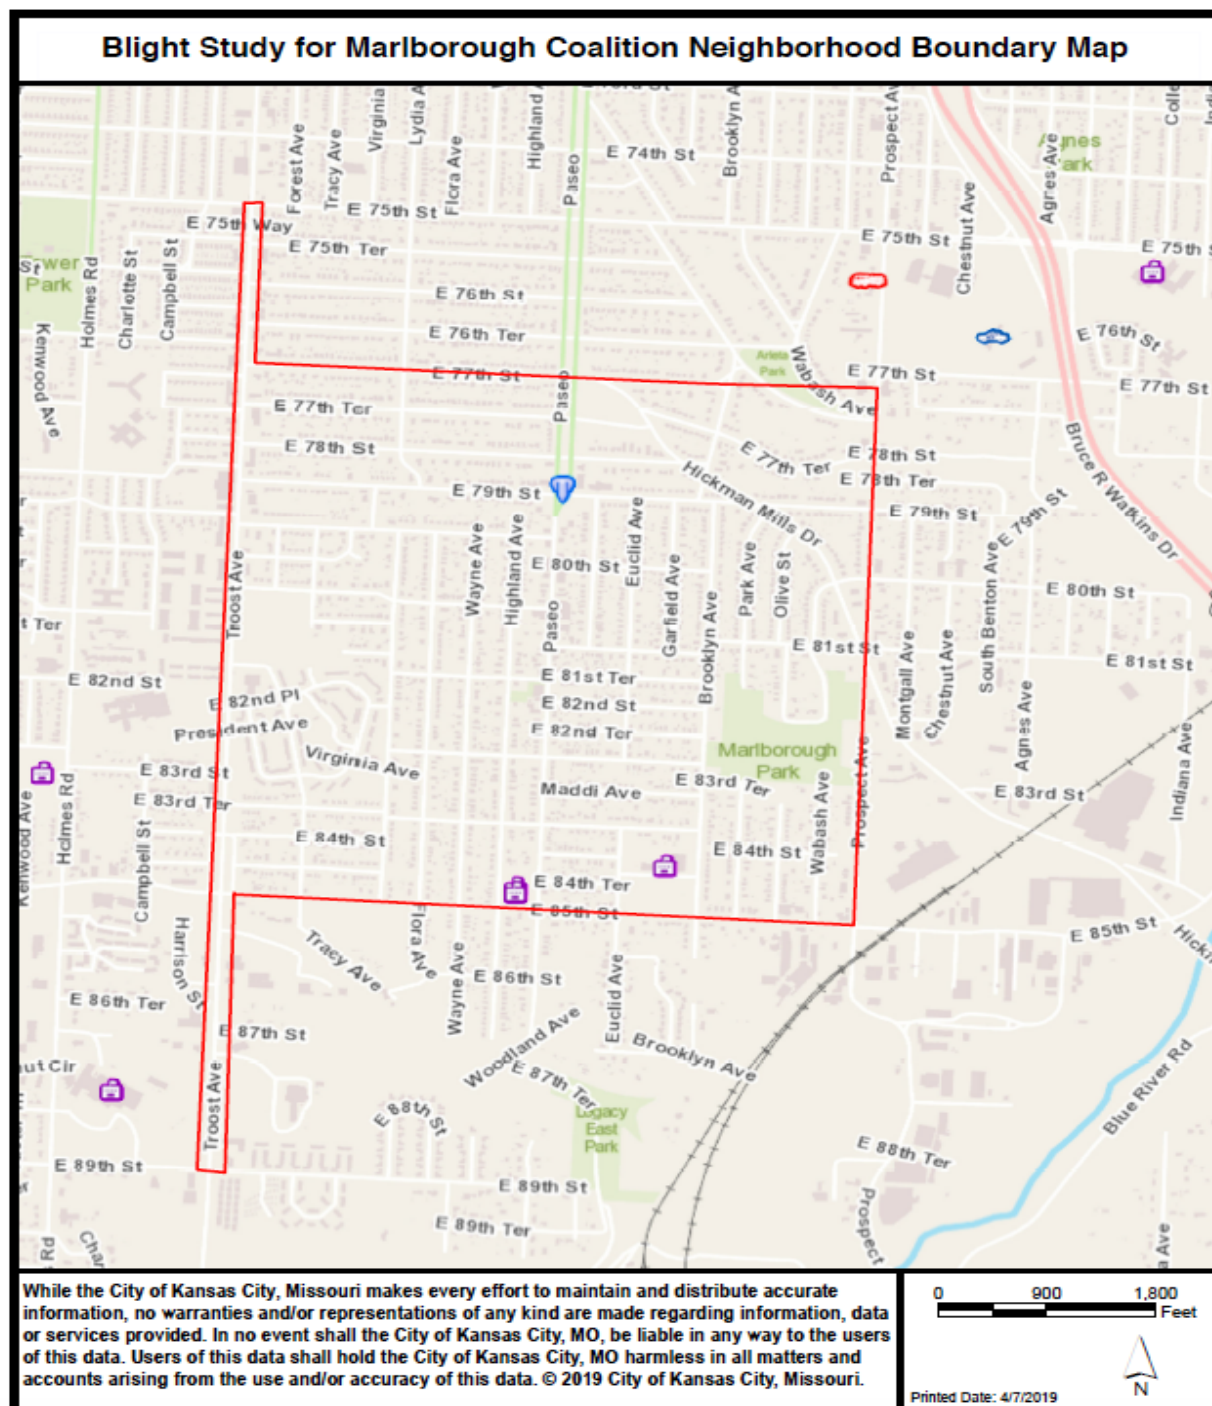

- 1) The Boulevard Heights Neighborhood, with its southern boundary at Gregory Boulevard, is currently in an Urban Redevelopment Area;
- 2) The Prospect Corridor URA, goes up Prospect Avenue from 77th Street to Meyer Boulevard;
- 3) The Fairyland Park URA, goes north/south from 77th Street to 75th Street and Prospect Avenue to Indiana Avenue on the east/west, both of which touch the northeastern boundary of the Study Area;
- 4) The Troost Avenue Community Improvement District, goes along the Troost corridor from 76th Street to Meyer Boulevard, abuts the northwest boundary of the Study Area.

Ownership & Legal Description

The Study Area contains approximately 1,236 property parcels. All of the parcels are identified by the Jackson County Assessor's office, according to Kansas City Parcel Viewer. Specific legal descriptions of all parcels within the Study Area and an approximate listing of the tax parcels identified by the Jackson County Assessor are included in Appendix A.

Report Format

This Blight Study is presented in four (4) sections and two (2) appendices. Section I presents an overview of the study, definitions of “blight” and other key terms, and the study methodology. Section II presents a description of the Study Area and an overview of existing conditions. Section III defines the primary categories of blight and documents conditions which are present within each category and provides a conclusion derived from the research. Section IV provides overall analysis and conclusions on the presence of blight within the Study Area.

Section II

Area Overview and Description

STUDY AREA CONTEXT

Location & Access

The Study Area encompasses an area bound by 77th Street on the north, 85th Street on the south, Prospect Avenue on the east, and Troost Avenue on the west. Also included in the Study is the Troost corridor, including all parcels that face both sides of Troost Avenue, from 75th Street to the north and 89th Street to the south. Troost Avenue and Martin Luther King, Jr. Boulevard (formerly The Paseo), its continuation as The Paseo, and Prospect Avenue are identified in the City's Major Street Plan as major street thoroughfares. These major street thoroughfares provide access to the local network of streets. The major east-west streets, including 75th and 85th, provide access to US Highway 71 in addition to the local network of streets.

The Study Area is bordered to the west by the Rolling Meadows and Santa Fe Hills neighborhoods, to the south by Hidden Valley, to the east by Marlborough East, and to the north by the continuation of the Marlborough Community Coalition Neighborhoods. Access to and from these adjoining neighborhoods is very good. There are no barriers to access these neighborhoods.

PROPERTY DATA

Land Area

According to calculations from Kansas City Parcel Viewer and the ESRI, the Study Area contains a total of approximately 348 acres, excluding all public rights-of-way.

Environmental

The Surveyors conducted several interviews and relied on an empirical study done for the Coalition by the Hoxie Collective, L.L.C. in finding the Study Area suffers from a number of environmental liabilities. Specifically, the Study Area suffers from extensive impervious surfaces, excessive air pollution, some dated buildings that contain asbestos and lead based paint, and a number of leaking or otherwise faulty underground fuel storage tanks. However, no independent, timely, or localized empirical data was found (nor was any independent testing done in association with this Blight Study) to confirm any of these findings.

If any one of these liabilities is confirmed to be true, then-- depending on the size, amount, and nature of the environmental liability—the issue may serve as a major obstacle to increasing the quality of localized and surrounding property in the Study Area and long-term resident health. Therefore, the Surveyors recommend that environmental inspections be conducted to identify and remedy any significant environmental liabilities prior to extensive redevelopment of the Study Area.

Real Estate Taxes

A five-year history of the assessed values within the Study Area is included in Appendix B.

The figures and assessed values in Appendix B have been gathered from publicly available sources related to the Study Area. All property is supposed to be re-assessed in odd-numbered years, however, new construction (including remodeling) can be assessed in any year.

In 2018, the properties within the Study Area should have generated \$12,513,439.00 in real estate taxes, per assessed values. Stated differently, the City is entitled to approximately \$0.57 per square foot of taxable property. 164 parcels in the Study Area are tax exempt, and of the 1,236 parcels that generate property tax revenue, 426 of them – or 34.46% - are delinquent with respect to property taxes. “Delinquent,” as it is used in the previous sentence, is meant to refer to any property that carries a taxable balance beyond the year’s final deadline, per Jackson County’s public records. Jackson County provides a further delineation of these delinquent properties by designating some of them as being subject to “Delinquency/Bankruptcy.” Owners of parcels that fall into this classification generally have not paid property tax on the respective parcel for several years. Accordingly, of the 426 tax delinquent parcels within the Study Area, 80 were so designated.

Utilities

All utilities are available to the properties located within the Study Area. Power throughout the area is generally above ground and unsightly.

Transportation

The Study Area is very well served by public transit. All properties within the Study Area are within one-half mile of a bus route, with bus service routes on The Paseo, Prospect Avenue, and Troost Avenue. Troost Max, a rapid bus transit line, is also located on Troost Avenue. Regular bus service is provided on 75th Street and 85th Street, respectively.

The Bike KC Plan contains a few bike routes for the Study Area. A signed bike route exists along The Paseo from Gregory Boulevard to 79th Street. Additional bike trails are planned for the Study Area along both sides of The Paseo until 85th Street, where the trails will then split east and west and continue beyond the boundaries of the Study Area to the Blue River Trail and Ward Parkway, respectively.

Pedestrian access is limited because the majority of streets having sidewalks on one side, and many streets having no sidewalks. Sidewalks are generally in poor to below average condition. The majority of the streets have no curbs and gutters, and disability access is available only on Troost Avenue and The Paseo.

Access to individual properties is well below average with the majority of the homes not having concrete driveways or parking areas.

Zoning Classification	Purpose*
R – 0.3 Residential 0.3 R – 0.5 Residential 0.5 R – 0.75 Residential 0.75 R – 1.5 Residential 1.5 R – 2.5 Residential 2.5 R – 5 Residential 5 R – 6 Residential 6 R – 7.5 Residential 7.5 R – 10 Residential 10 R – 80 Residential 80	The R district names (map symbols) are intended to provide a general indication of what is allowed in the district, with the "R" denoting the residential orientation of the district and the numeral providing a general indication of the allowed density, expressed in terms of the required minimum lot area per dwelling unit (in thousands). The R-7.5 district, for example, is a short-hand reference to a residential district that generally allows one dwelling unit per 7,500 square feet of gross site area. Kansas City's residential (R) zoning districts are primarily intended to create, maintain and promote a variety of housing opportunities for individual households and to maintain the desired physical character of existing and developing neighborhoods. While the districts primarily accommodate residential use types, some nonresidential uses are also allowed. The R district standards provide development flexibility, while at the same time helping to ensure that new development is compatible with the city's many neighborhoods. In addition, the regulations offer certainty for property owners, developers, and neighbors about the limits of what is allowed.
B1 – Neighborhood Business 1 B2 – Neighborhood Business 2 B3 – Community Business B4 – Heavy Business/Commercial 4	The primary purpose of the B district names (map symbols) are intended to provide a general indication of commercial businesses in the district. B zoning districts are primarily intended to accommodate and promote neighborhood and community serving retail sales or service uses, as well as mixed use development consisting of business uses on a building's lower floors and residential uses on upper floors. This type of vertical, mixed use development is encouraged in many areas of the City because it reflects the City's traditional urban, pedestrian oriented character. Encouraging residential development in mixed use zoning districts also provides increased housing choice and opportunities to promote higher density housing. The B districts are distinguished primarily on the bases of allowed uses and commercial floor area limits.

M1 – Manufacturing 1 M2 – Manufacturing 2 M3 – Manufacturing 3 M4 – Manufacturing 4	When this zoning and development code refers to "manufacturing" zoning districts or "M" districts, it is referring to these districts.
MPD – Overlay District	Overlay districts are for areas of the City that have unique qualities requiring special treatment or locations where special approaches to development may be warranted. They are established as a means of addressing specific aspects of land use control or development design that transcend base zoning district provisions. Additionally, overlay districts permit greater design flexibility than otherwise permitted by the conventional standards of this zoning and development code. As the name implies, overlay districts "over-lay" applicable base district classification to alter some or all of the zoning regulations that apply to particular sites. Overlay districts may be appropriate in areas where there are natural resource considerations, where historic preservation is needed, where there is the need to balance institutional development with the need to preserve surrounding neighborhoods, to maintain community character, for infrastructure protection or to accomplish city policy objectives for specific areas. In the Study Area, MPD is the overlay district included. Different types of MPDs will promote different planning goals. In general, MPDs are intended to promote numerous social and community objectives.

***Kansas City Zoning & Development Code**

Topography

The Study Area is defined by gently rolling hills. The slope is generally from the southeast, where the lowest elevation is 823 feet above sea level, to the northwest, where the highest elevation is 991 feet above sea level. The mean elevation is 964 feet. The entire Study Area is in the Little Blue River watershed, and does not include any flood plains.

IMPROVEMENTS

Opportunities

The Study Area contains residential uses that are single and multi-family home designations. The houses are of varied styles and have been built primarily in the early to mid 20th Century. Common blighting factors observed in the Study Area were exterior roof, window, and wall deterioration. In addition, there is substandard residential streetscape with limited walkability as well as overwhelming evidence of excess brush, unsanitary trash, and unsafe structures scattered across the Study Area. A high number of single-family and multi-family residences are vacant and have been boarded. Of the 1,018 parcels within the Study Area, 34.38% (350) are vacant lots.

Billboards

Billboards are recognized as a potential causal factor of blight, as unsightly billboards can result in economic and social liability. The Kansas City Zoning Ordinance acknowledges this in §88-445-14 Outdoor Advertising Signs:

The purpose of this section is to preserve and promote the public health, safety and welfare and to provide an orderly, effective and reasonable control of off-premise signs, thereby halting sign proliferation, reducing distractions to drivers and enhancing the visual environment and community character of the city.

There are several billboards within the Study Area, with the majority located along the Troost corridor. The billboard locations within the Study Area include:

- 1) 7720 Troost Avenue;
- 2) 7721 Troost Avenue;
- 3) 7822 Troost Avenue;
- 4) 7817 Troost Avenue;
- 5) 8015 Troost Avenue;
- 6) 1040 East 85th Street;
- 7) 1111 East 85th Street;
- 8) 8105 Hickman Mills Drive;
- 9) 8025 Hickman Mills Drive.

Photos of selected billboards within the Study Area are included below.

7220 Troost Avenue

7817 Troost Avenue

1111 E. 85th Street

7701 Troost Avenue

Commercial Entities

The Study Area has two main commercial districts, located along Troost Avenue and The Paseo. Many of the commercial buildings show signs of deterioration. Multiple buildings in the area are vacant, abandoned, or in a state of disrepair. There are several vacant lots, as well as lots that are used to store automobiles and other vehicles. Throughout the entire Study Area, site improvements, both public and private, are typically deteriorating. Roads are in less than optimal condition, demonstrating signs of wear, cracking, and potholes. Sidewalks additionally show signs of deterioration, with numerous instances of cracking and vegetation growth. Examples of these conditions are demonstrated in the photos below.

1802 E 80th Street - Vacant Building, Sidewalk and Parking Lot Deterioration

8016 The Paseo - Shuttered Businesses, Street and Sidewalk Deterioration

7943 The Paseo - Vacant Buildings, Empty Lot

7965 The Paseo - Lot Being Used for Automobile Storage

8002 The Paseo – Shuttered Business

According to the ReferenceUSA business database, the Study Area is currently home to approximately 280 active businesses. The most common business entities are beauty salons and

churches, with a total of ten (10) each. Other categories of businesses include: automobile repair shops (9); used car dealerships (7); restaurants (6); and child care service providers (5).

The overall composition of the business community is made up primarily of small businesses with fewer than four employees and having less than \$500,000 in annual sales. The businesses are mostly service oriented, with a great deal of automotive repair services and contractors located in the area.

The largest employers within the Study Area are the Center School District and Schweiger Construction Company, with approximately 50 employees each. Most businesses in the Study Area employ between one and four workers.

The Study Area's largest company in terms of sales volume is a trucking company named Transportation Logistics Systems. It is the only company in the Study Area with an annual sales volume exceeding \$10,000,000 as they recently reported an annual sales revenue of \$12,544,000.

The annual sales volume of all businesses in the Study Area as recorded in the ReferenceUSA business database is charted below.

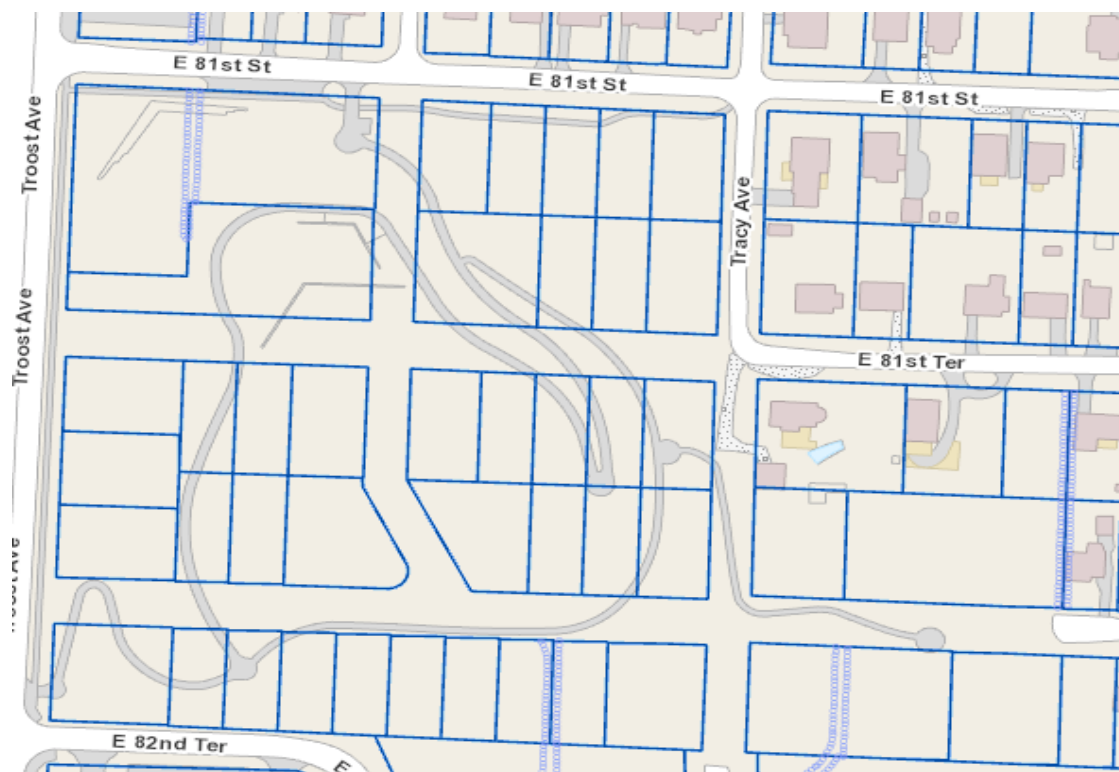

# of Businesses	Annual Sales Volume
1	>\$10,000,000
8	>\$5 million <\$10 million
10	>\$2.5 million <\$5 million
37	>\$1 million <\$2.5 million
49	>\$500,000 <\$1 million
113	<\$100,000

In addition, automobiles are a large constituent of the product market, with many used car dealerships located throughout the Study Area. The Surveyors determine the Study Area is overserved in this aspect of commercial business while simultaneously being underserved in many other areas of commercial business. For example, residents in the Study Area lack easy access to many important goods and services. The most pressing need is for access to fresh fruits and vegetables, as there are no grocery stores within the Study Area. There are also no pharmacies or drug stores within the Study Area, limiting access to medications. This lack of access is particularly concerning in light of the fact that nearly a quarter of the population is over the age of 60. Finally, there is an absence of availability of legal counsel as no practicing law firms are contained within the Study Area.

Vacant Parcels

The Study Area includes 350 vacant parcels. More than 28% of the parcels in the Study Area are vacant. Most of these parcels are residential lots, and are located throughout the Study Area.

The map below outlines forty-five (45) vacant lots that are situated within the Study Area between 81st Street and 82nd Terrace, just east of Troost Avenue.

NEIGHBORHOOD DEMOGRAPHICS

Unemployment

The April, 2019 unemployment rate within the Study Area is 9.1%, which can be compared to a Kansas City, Missouri rate of 4%, and a statewide rate of 3.2%.

Census Data

The following provides population, household and income trends for the census tracts that contain the Study Area. Census Tracts 89, 90, 95, 96, and 97 contain the Study Area. The census tracts cover an area generally bound by Gregory Boulevard on the north, Blue River Road on the east, 95th Street on the south, and Troost Avenue on the west, along with Holmes Avenue on the west between 85th and 95th.

All data was obtained from the Missouri Census Data Center. All data for 2017 is from the *American Community Survey (ACS) Profile Report: 2013-2017 (5-year estimates)*. All other data is from the U.S. Census Bureau.

Census Tract	Historical Population Figures			
	1990	2000	2010	2017
89	2,448	2,186	2,139	2,036
90	5,300	4,888	4,413	4,586
95	3,693	3,874	3,145	2,986
96	1,853	1,666	1,719	1,720
97	1,750	1,725	1,473	1,670
Total	15,044	14,339	12,889	12,998
Decennial Change		-4.69%	-10.11%	+0.84%
Change from 1990			-14.32%	-13.60%

Census Tract	Historical Total Household Figures			
	1990	2000	2010	2017
89	755	827	817	782
90	1,883	1,826	1,705	1,714
95	1,525	1,502	1,244	1,126
96	701	679	644	636
97	785	853	693	797
Total	5,649	5,687	5,103	5,055
Decennial Change		+0.67%	-10.27%	-0.94%
Change from 1990			-9.66%	-10.51%

Census Tract	Median Household Income			
	1990	2000	2010	2017
89	\$28,893	\$30,891	N/A	\$36,765
90	\$26,792	\$32,262	N/A	\$34,490
95	\$21,178	\$31,103	N/A	\$32,669
96	\$16,467	\$27,500	N/A	\$20,455
97	\$22,658	\$29,315	N/A	\$24,798
Average	\$23,198	\$30,214	N/A	\$29,835
Decennial Change		+30.24%		-1.24%
Change from 1990				+28.61%

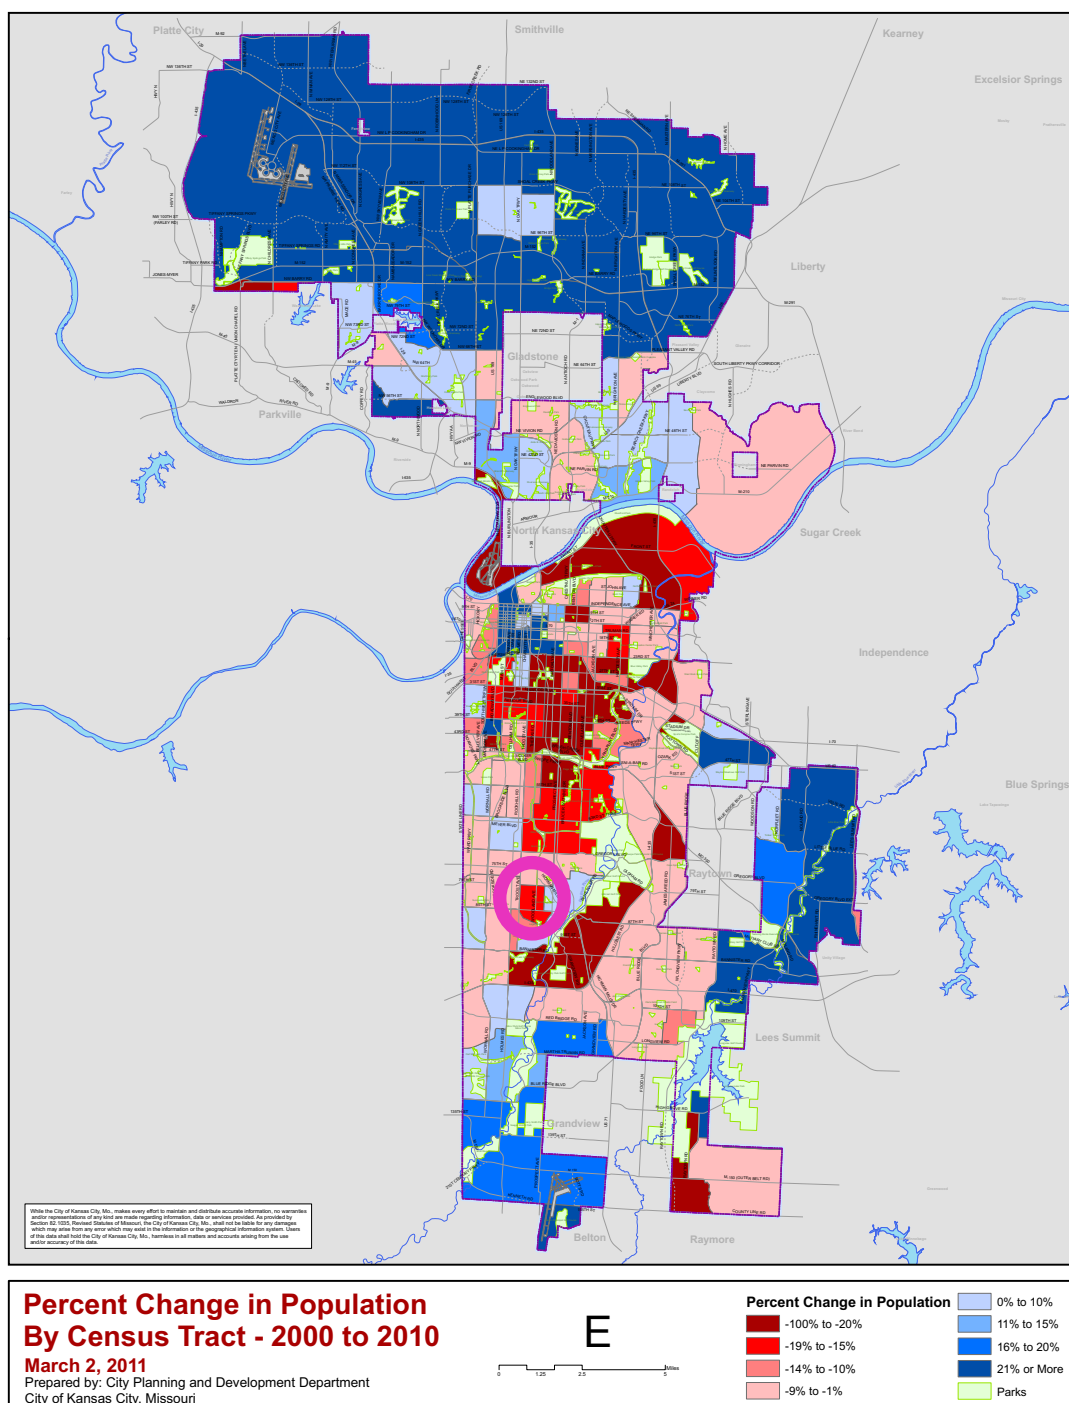

The census figures indicate significant population and household declines in the Study Area between 1990 and 2017. In stark contrast, the City of Kansas City, Missouri experienced population growth during the same period.

The Study Area saw a rare decline in average median household income between 2000 and 2017. In 2017, the Study Area had an average median household income that was only about 59% of the City's median household income. The median household income for the City of Kansas City was

\$50,652 in 2017.

When looking at other demographic data from the ACS 2017 Profile (5-year estimates) for the Study Area, the percentage of single-mother households was more than double the rate of the City. Also, there were more than twice the amount of family households currently living in poverty than the City average.

The following map prepared by the City Planning and Development Department of Kansas City, Missouri, illustrates the changes in census tract population from 2000 to 2010 within the Study Area.

Section III

Factors of Determination for Study Area Conditions

Significant findings of this Blight Study are presented in the following discussion. These findings are based on a review of documents and reports, interviews, field surveys, and analyses conducted from early February through mid-April 2019. The field surveys occurred over several days and at different times of the day in order to observe a variety of conditions. Properties and buildings, along with public improvements adjacent to the properties, were evaluated and deficiencies noted.

As previously explained, the purpose of this Blight Study was to determine whether conditions as defined by RSMo. 99 of the Missouri State Statute exist in the Study Area. The principal categories reported here, in line with the statute, include: defective or inadequate street layout, improper subdivision or obsolete platting, deterioration of site improvements, and insanitary or unsafe conditions. Additional categories including a health assessment and crime statistics were examined to give further context on the prevalent issues within the Study Area that may contribute to a determination of blight.

Factor 1: Defective or Inadequate Street Layout

As defined by the LCRA, conditions typically associated with defective or inadequate street layout include poor vehicular access and/or internal circulation within the Study Area; substandard driveway definition and parking layout (e.g. lack of curb cuts, awkward entrance and exit points); offset or irregular intersections; and substandard or nonexistent pedestrian circulation.

As noted above there are several conditions used to determine whether a Study Area is blighted based on defective or inadequate street layout. During numerous on-site investigations and field surveys, these conditions were observed throughout the Study Area. Properties that had a small adjacent parking lot with awkward or dangerous access to and from the street were considered to have defective or inadequate street layout.

Of the parcels surveyed in the Study Area, over 50% exhibited defective or inadequate street layout. Most of the properties satisfying this criterion for blight are residential properties, vacant parcels, and some commercial properties, all of which do not have sidewalks and/or curbs or gutters. This was prevalent throughout the Study Area.

Examples of defective or inadequate street layout are illustrated in the photos below.

1830 E. 83rd Streetscape - Lack of Curb Cut

84th & Tracy Avenue Streetscape - Substandard Pedestrian Circulation

84th & Tracy Avenue Intersection - Irregular Intersection

1115 E 83rd Terrance - Substandard Driveway & Parking

Factor 2: Improper Subdivision or Obsolete Platting

There are specific conditions that can be used to determine whether a Study Area is blighted based on improper subdivision or obsolete platting. Among these conditions are faulty lot shape and/or layout, inadequate lot size, poor access, as well as conformity of use. On-site investigations and field surveys, and review of public records suggest these conditions can be found throughout the Study Area.

Lot layout is deemed to be faulty if the configuration relative to the street is contrary to what is desired for development. Lot shape is considered faulty if the shape is unusual to an extent that it deters or constrains development options. Obsolete platting within the Study Area was relatively prevalent due to deteriorating conditions along most neighborhood streets and some major thoroughfares.

The photographs below illustrate examples of improper subdivision or obsolete platting in the Study Area.

8253-8255 Flora (Vacant Corner Lot) - Faulty Lot Shape

8416 Highland - Inadequate Layout (No Parking)

8421 Wayne – Non-conformity of Use

8240 Flora - Obsolete Platting

Factor 3: Deterioration of Site Improvements

The condition of deterioration of site improvements was primarily established through field survey work and observation of exterior physical conditions in the general Study Area. No interior inspections were conducted. Building deterioration rating criteria considered included the following: primary structure (roof, walls, foundation); secondary structure (fascia/soffits, gutters/downspouts, exterior finishes, windows and doors, stairways/fire escapes); and exterior structure (mechanical equipment, loading areas, fences/walls/gates, other structures).

Although structural deterioration is most pronounced and obvious at certain vacant structures in the Study Area, examples of this condition can be found within properties throughout the Study Area. The most common examples of structural deterioration found in the Study Area involved roof and wall deterioration, poorly maintained exterior finishes, fascia deterioration, and deterioration of fences, walls, gutters, and stairways/steps. Some properties were observed to have outbuildings in disrepair.

Examples of properties affected by structural deterioration in the Study Area are shown in the photos below.

1202 E. 83rd Terrace - Primary Structure Deterioration

82nd & The Paseo - Exterior Structure Deterioration

84th & Tracy Avenue - Secondary Structure Deterioration

83rd Terrace & Brooklyn - Primary and Secondary Structure Deterioration

Factor 4: Insanitary or Unsafe Conditions

There are numerous locations within the Study Area exhibiting insanitary or unsafe conditions. Of the six blighting factors, it is the most prevalent in the Study Area. Conditions considered unsafe or insanitary within the Study Area include the existence of trash/debris, weeds, cracked or uneven sidewalks, and graffiti. Of the parcels surveyed in the Study Area, over 50% met this criterion.

Due to the age of the structures within the Study Area it is reasonable to expect that there would be some presence of asbestos, lead (paint), and possibly heating oil tanks. However, this Blight Study does not assume that any of the properties located within the Study Area contain any amount of environmental contamination unless previously noted within this report.

The existence of trash, debris, and weeds can be found throughout the Study Area.

Examples are shown in the photos below.

1840 E. 81st - Insanitary Backyard with Excess Trash

7920 Virginia Ave. - Excess Trash and Weeds Throughout Backyard

8021 Flora - Unsafe Conditions (Damaged Roof)

8105 Flora - Unsafe Condition (Visible Fire Damage)

8127 Lydia - Unsanitary Conditions Throughout (Vacant Home)

8153 Brooklyn - Unsafe Vacant Structure

8231 Highland - Excess Trash in Front Yard

Factor 5: Health Assessment

The Study Area is associated with zip codes 64132 and 64131. Code 64132 is distinguishable as one of the lowest life expectancy zip code areas in the City. Moreover, according to the Kansas City Health Department's 2016-2021 Community Health Improvement Plan ("KC-CHIP"), zip code 64131 is among one of the few zip codes that have experienced little to no improvement in life expectancy overall. Further, aside from childcare, healthcare services are severely lacking and there are no grocery stores or public libraries within the boundaries of the Study Area.

The following excerpt analyzes a wellness survey taken within the City:

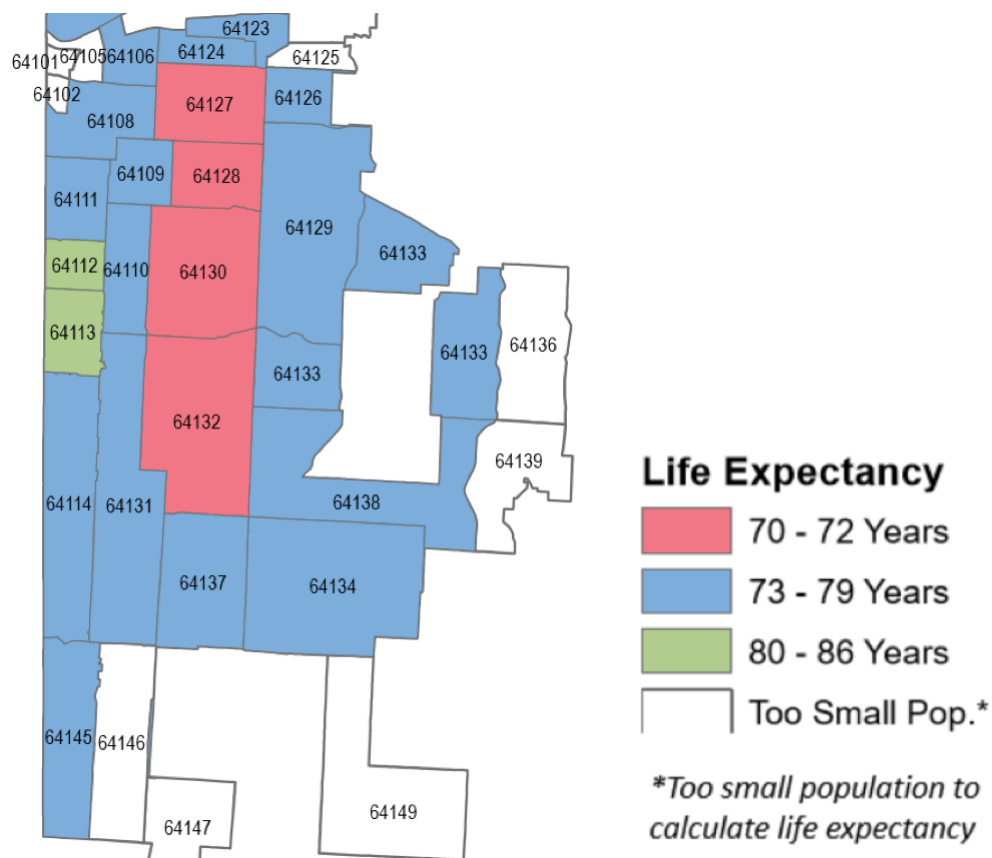

The Quality of life and Community Themes and Strengths Assessments engaged over 400 residents through survey data and a series of listening sessions designed to measure how the people of Kansas City felt about their communities. Statistical tests of the association between demographic characteristics and the perception of quality of life in the survey data revealed a few patterns. There was no significant relationship between respondent income and most quality of life questions. There was a strong, statistically compelling relationship between race and overall community satisfaction driven by differences between Black and White respondents. This pattern was repeated for dissatisfaction with availability of illness treatment and neighborhood safety. (KC-CHIP 11).

In 2010, Missouri census data on race and ethnicity percentages (updated as of September 2018) for all census tracts within the Study Area shows that an average of 75.6% of the population is African-American, whereas Jackson County overall is just under 23.9% African-American. These facts illustrate how the glaring lack of minority access to basic health services, knowledge resources, and quality nutrition is a major issue within the Study Area.

The KC-CHIP survey also asked open ended questions such as, "what services or programs do you feel improve the quality of life in your community?" The most frequent responses were healthy food, well-kept homes, accessible health care, and overall quality education. This shows there is a clear and justifiable presumption of inequitable circumstances at play, and improving the Study Area's deteriorating conditions is the initial step towards increasing overall quality of life for 20,000 plus residents within the Study Area.

In sum, addressing blight can greatly improve the overall health conditions of communities. KC-CHIP also states, "[b]lighted neighborhoods can lead to an increase in crime, a depletion of social cohesion and exposure to toxic substances in the air and water. Encouraging residential stability and improving neighborhood aesthetics can go a long way in increasing life expectancy." It is hoped and believed by the Coalition and Surveyors that addressing the Study Area's blight is a vital first step towards addressing overall community health concerns.

The following map illustrates the disparity in life expectancy between citizens within the Study Area and the surrounding area.

Factor 6: Crime Statistics

The Study Area is prone to higher crime relative to both Kansas City and Missouri as a whole. The following statistics were compiled using the ESRI research database and illustrate the substantial presence of criminal activity within the Study Area.

Incidents of violent crime in the area average 13.15 per 100,000 people, as compared to an average of 4.72 in Kansas City and 1.45 in Missouri.

Incidents of property crime in the area average 20.04 per 100,000 people, as compared to an average of 12.45 for Kansas City and 7.76 for Missouri.

These rates are also higher than the national crime rate of 1.05 average daily incidents per 100,000 people for violent crime and 6.47 average daily incidents for property crime.

The following table includes crime statistics for the Study Area gathered by the Kansas City Police Department – Metro Division, between the dates of January 1, 2017 and December 31, 2017.

Type of Crime	Annual #
Homicide	4
Rape	7
Robbery	20
Aggravated Assault	60
Residential Burglary	69
Non-Residential Burglary	6
Larceny	59
Auto Theft	49
Arson	8
Non-Aggravated Assault	103
Intimidation	17
Forgery	2
Fraud	13
Vandalism	74
Sex Crimes	3
Suicide	6
Other	150
Total	650

Section IV

Summary of Blighting Factors & Conclusion

The Study Area suffers from numerous conditions that contribute to the existence of blight in the Marlborough Community Coalition Neighborhood. The presence of the various blighting conditions is summarized in the following paragraphs.

Defective or inadequate street layout is an area of concern in the Study Area, with many streets lacking sidewalks, curbing, and proper parking access. The condition of defective or inadequate street layout was present in over 50% of the parcels surveyed throughout the Study Area.

The presence of improper subdivision and obsolete platting is prevalent throughout the Study Area. Parcels frequently demonstrated conditions such as faulty lot shape, inadequate layout, non-conformity of use, and obsolete platting. The presence of dysfunctional and restrictive configurations is common within the Study Area.

Deterioration of site improvements is apparent throughout the Study Area. Deterioration and aging is present in many primary structures as well as in a number of outbuildings in the area. Site improvements in the Study Area often demonstrate roof and wall deterioration, poorly maintained exterior finishes, fascia deterioration, and deterioration of fences, walls, gutters, and stairways/steps. The presence of deterioration is a frequent occurrence, particularly among vacant parcels. There is a high rate of vacancy among parcels, with vacant parcels comprising 35% of the total parcels in the Study Area.

The presence of insanitary or unsafe conditions is the most prevalent blighting factor in the Study Area. Over 50% of the parcels surveyed in the Study area exhibited conditions considered unsafe or insanitary, including the existence of trash/debris, weeds, cracked or uneven sidewalks, and graffiti. Additionally, at the time of the study there were 478 open 311 cases against parcels in the Study Area for property violations or other service requests made to the city. The presence of billboards also adds to the overall insanitary condition of the area as there are seven billboards with visible deterioration present in the Study Area.

In the past few decades, the Study Area has seen either a significant decrease or little to no improvement in life expectancy. If a resident within the Study Area simply decided to move two miles west, it is possible their life expectancy would increase by more than ten years. In addition, there is a general lack or complete absence of health services, grocery stores, and public libraries within the Study Area, and there is a clear representation of inequitable circumstances. The Kansas City Health Department notes that blighted areas lead to an increase in crime and likelihood of encountering environmental hazards. Addressing blight is a fundamental first step in tackling the overall community health concerns the Study Area is facing.

Crime data indicates that high crime rates are present within the Study Area and pose a danger to both life and property. Incidents of violent crime in the Study Area are 2.79 times more prevalent than in the City as a whole, and 9.07 times more prevalent than the State of Missouri. Incidents of

property crime are 1.61 times higher in the Study Area than the City, and 2.58 times higher than the rate for the State of Missouri. Further, violent crime rates in the Study Area are 12.52 times higher than the national rate and property crime rates are 3.01 times higher than the national rate.
